Dear Source Water & UIC Section Ryan Hancharick,

I am a resident of Oakmont, a contiguous community closely situated near this injection well. A few years ago, I was instrumental in organizing the Citizens to Protect Oakmont which worked to organize our Borough to strengthen the oil and gas ordinance to protect the health and safety of our citizenry. Our group, also worked to have the Borough pass a resolution against the first injection well and have worked with our Council to pass a second resolution against this proposed injection well. Since our community is contiguous to Plum and our oil and gas ordinance has a set back requirement to protect our community, we believe this gives Oakmont a standing to object to this well.

I am demanding you to DENY the proposed Plum Injection Well, Sedat #4A. Injection Wells like this put drinking water at risk and coincide with a plethora of other impacts. When this injection well fails and contaminates Allegheny County's drinking water, residents could potentially be exposed to chemicals that will cause long-term health issues, including cancers, heart and lung disease, liver and kidney toxicity, etc. Allowing this Injection Well to operate will violate my right as a Pennsylvania citizen to pure water as stated in Article I, Section 27 of the Pennsylvania Constitution.

Sincerely,
